PERSONALIZED CANCER TREATMENT

A multidisciplinary event

Editorial

It's a great pleasure for us to host the **9th MACC Conference** (*Mediterranean Alps Cancer Conference*) in the prestigious site of Saint-Paul de Vence, in a workshop atmosphere, and with a theme that should interest a lot our attendees: ***Personalized Cancer Treatments in Surgery, Radiation Oncology, and Medical Oncology.***

This really multidisciplinary program was elaborated to be consistent with our goals, and with the frame of the "MACC Approach": a perfect mix of brilliant communications by well-known experts and of friendly social exchanges!

MACC Meetings are hold since 1999, every year until 2001, and then every 2 years, alternatively in **France** (Nice, with one exception in Poitiers in 2011) and **Italy** (Cuneo, Piemonte), with the same team of organizers since the beginning, all dedicated with enthusiasm to the success of these conferences!

MACC Meetings were mainly focused on Head and Neck Cancer until now, but we decided to extend the program of this MACC 9 session to other localizations, including communications on Breast, Prostate and Lung.

We do hope you'll appreciate this Program, as much as you should like your venue in the famous village of Saint-Paul-de Vence, city of Art, Leisure and serenity.

Welcome back on the Côte d'Azur for this 9th MACC Conference!

G.Milano, R-J.Bensadoun, M.Schneider M.Merlano, O.Garrone, C.Lo Nigro

Scientific program

Friday March 20th 2015

- 09.30 Welcome address from CAL and local authorities
Joël Guigay – Nice, France
- 09.45 Introduction: personalized cancer treatment
Gérard Milano et René-Jean Bensadoun – Nice, France

Session 1 Personalized radiation therapy

Chairperson: **Elvio Russi** – Cuneo, Italy

- 10.00 Stereotactic-Radiotherapy for brain metastases: how far should we go?
Jean Bourhis – Lausanne, Switzerland
- 10.30 High Precision radiotherapy - personalized techniques
Volker Budach – Berlin, Germany
- 11.00 Coffee break
- 11.15 Preservation of healthy tissues
René-Jean Bensadoun – Nice, France
- 11.45 Data mining and evidences promotion in personalized radiation therapy
Vincenzo Valentini – Rome, Italy
- 12.15 General discussion
Discussant: **Vincenzo Valentini** – Rome, Italy

Scientific program

Friday March 20th 2015

Symposium Merck Serono Medical strategies in Head and Neck cancer: Personalizing therapy

Chairperson: **René-Jean Bensadoun** (Nice, France)
